PF95LP

Standard Features

- 80-lb. (40-liter) oil capacity
- Low profile -- fits under most fryers
- Simple to use. Easy to clean
- 4 GPM pump, 1/3 H.P. heavy-duty motor
- 5' (152.4 cm) return hose and non-heat conducting handle
- Cover with opening for return hose
- Durable stainless steel pan and pump housing
- Heavy-duty casters with welded construction
- Filter starter kit

Options & Accessories

- See Frymaster Price List for filter supplies and optional filtering accessories

Specifications

Designed to make daily filtration easy, quick and efficient

Frymaster's durable PF95 portable filter is designed to support routine oil filtration which preserves oil life and maintains consistent fried food quality. Crumbs, sediment, and by-products created by high-heat frying take a toll on oil life unless a daily system of filtration and frypot cleaning is in place.

The filters' powerful 4 GPM, 1/3 H.P. heavy-duty pump circulates the used oil through the filter media to trap the crumbs, sediment, and by-products that compromise

flavor profiles and reduce useful oil life. The pump then returns the clean filtered oil back to the frypot. Cleanup is easy, simply remove the filter media.

The 5' hose returns filtered oil with ease, amply reaching the frypot to wash crumbs from the walls and the bottom of the frypot. The quick disconnect feature on the hose allows for compact storage and easy cleaning.

Due to the low pan height of the PF95LP (9-3/8"), they fit under the drains of most fryers.

PF95 Low Profile Portable 80-lb Capacity Oil Filter
